

ModularOSM

Brand Concept

Presented By : Tiwi Lanre-Adisa

The Context

MOSM operates in the emerging category of modular infrastructure manufacturing.

The company specializes in assembling large-scale data centre components into fully integrated modular systems that can be rapidly deployed on-site.

Clients include global technology leaders such as hyperscale cloud providers.

The Solution

MOSM operates in modular infrastructure manufacturing, using off-site manufacturing to produce scalable systems.

This approach enables faster deployment, consistent quality, and scalable production for hyperscale infrastructure.

Current	Desired
Operational vendor	Strategic infrastructure partner
Functional	Enterprise-grade
Small manufacturer	Systems-driven company

The Brand Problem

MOSM is technically strong but visually underdeveloped. Its current brand does not reflect the precision, scale, and strategic importance of its infrastructure systems.

Competitive Positioning

Competitors focus on power solutions and project delivery. MOSM focuses on engineered systems designed for hyperscale infrastructure.

MOSM = Engineered systems for hyperscale infrastructure deployment

Brand Positioning

For infrastructure leaders at global technology firms, MOSM is a strategic manufacturing partner that delivers scalable modular data centre systems built with the precision and reliability required for hyperscale deployment.

Brand Pillars

Precision

Engineered accuracy and manufacturing rigor that ensures reliability at scale.

Systems Thinking

Structured modular architecture designed for intelligent infrastructure integration.

Scalable Architecture

Repeatable infrastructure frameworks built for hyperscale deployment with consistent quality and performance.

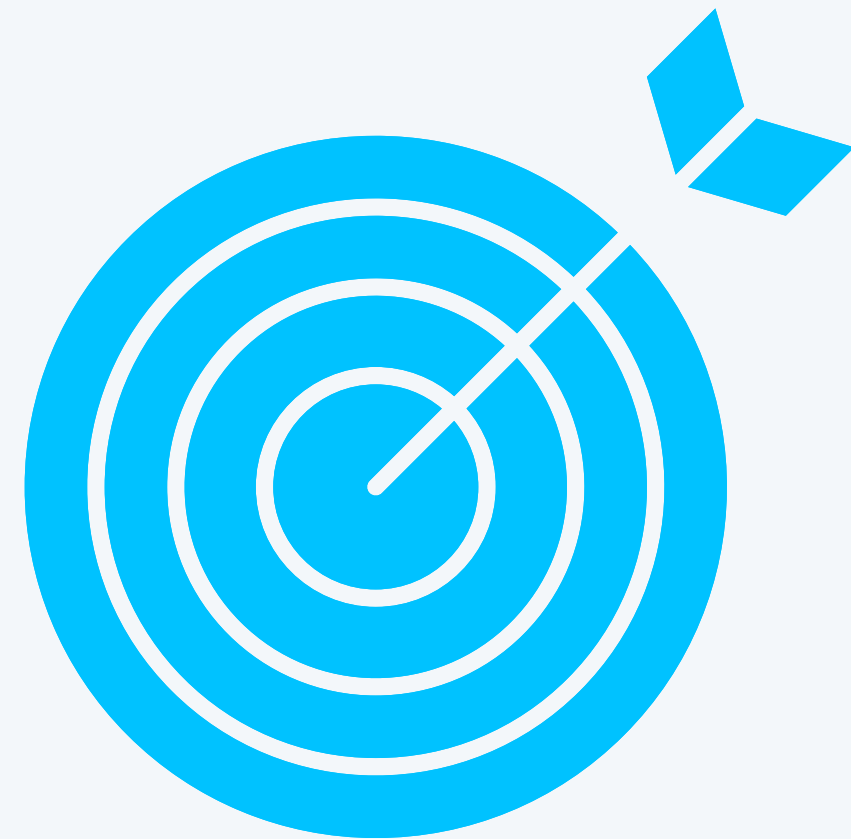

Brand Impact

The MOSM brand is designed to evoke:

- Confidence
- Clarity
- Structural Assurance
- Long-term Security

MOSM represents engineered certainty for hyperscale infrastructure.

Logo Concepts

Three logo concepts explore different visual directions for ModularOSM, focusing on themes of modularity, infrastructure systems, and technical precision.

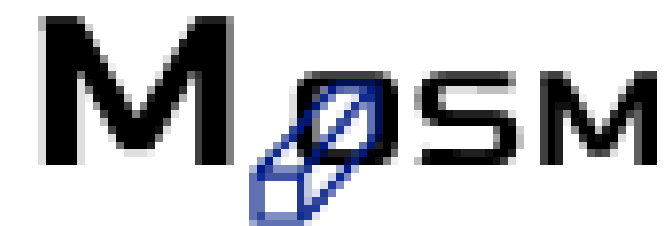

**Concept 1: Precision

**Concept 3: Structural
Framework Symbol**

Color System

The ModularOSM color system balances clarity, contrast, and hierarchy. A strong primary blue establishes brand identity, supported by neutral tones for structure and a bright accent for emphasis and interactive elements.

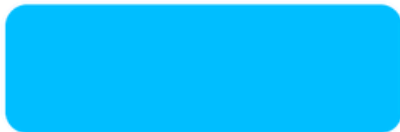

Color System

The MOSM color system establishes a clear visual hierarchy and ensures consistency across digital interfaces. The palette consists of a primary brand color, supporting neutrals, and an accent color used for emphasis and visual contrast. Each color has a defined role to maintain clarity, accessibility, and balance across UI components.

Brand Colors

Primary
#031D86
CTAs, headers, key actions

Accent
#00C2FF
Highlights, links, badges

Neutrals

Neutral Dark
#1E1E1E
Body text, headings

Neutral Light
#F5F6F8
Backgrounds, surfaces

Example Usage In UI

Card Element

Color Usage Guidelines

- Primary**
Use for main CTAs, navigation highlights, and primary interactive elements
- Accent**
Use for links, badges, highlights, and secondary interactive elements
- Neutral Light**
Use for page backgrounds, card surfaces, and subtle dividers
- Neutral Dark**
Use for body text, headings, and content that requires strong contrast

Typography

The ModularOSM typography system is designed to balance technical precision with clarity and accessibility.

The typography system combines Goldman for strong, engineered headings and Open Sans for clear, highly readable body text. Together they create a modern hierarchy suited for modular systems and technical communication.

Typography Guide

Typeface

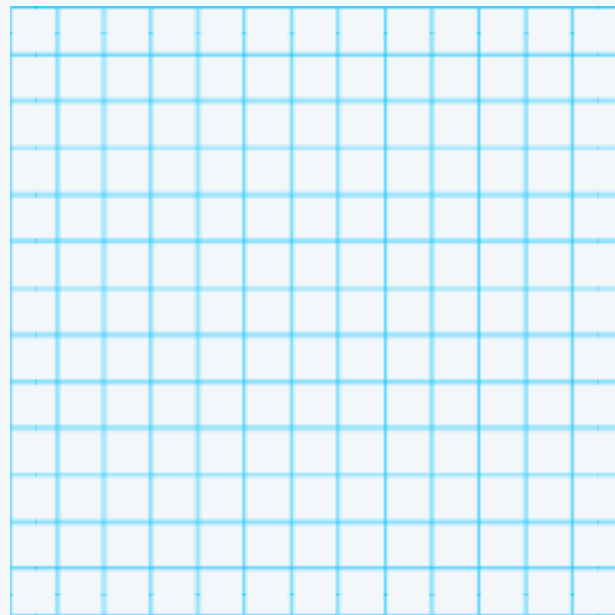

Aa Goldman Bold / Regular Primary Brand Typeface	Aa Open Sans Regular / SemiBold Secondary Typeface
--	--

Type Scale & UI Usage

STYLE	TYPEFACE	WEIGHT	SIZE	USE
Display	Goldman	Bold	61	Hero messaging
H1	Goldman	Bold	49	Page title
H2	Goldman	Bold	39	Section Title
H3	Goldman	Regular	31	Subsection
H4	Goldman	Regular	25	Card headings
Lead	Open Sans	Bold	20	Intro text
Body	Open Sans	Regular	16	Paragraph Content
Navigation	Open Sans	SemiBold	16	Navigation menu
Button	Open Sans	SemiBold	16	Buttons
Label	Open Sans	SemiBold	13	Form Labels / UI labels
Caption	Open Sans	Regular	12	Metadata / footnotes

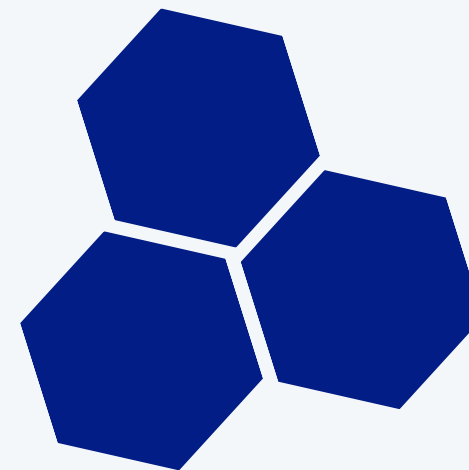

Visual Language

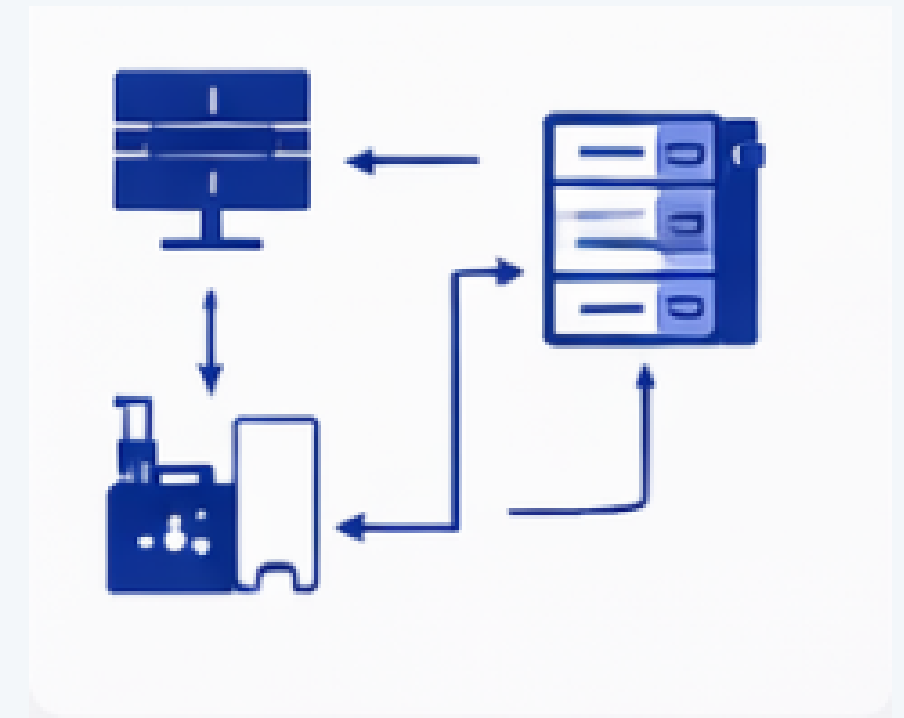

Structural Lines

Blueprint-inspired grids that reference engineering diagrams

Modular Shapes

Geometric components reflecting modular architecture

System Diagrams

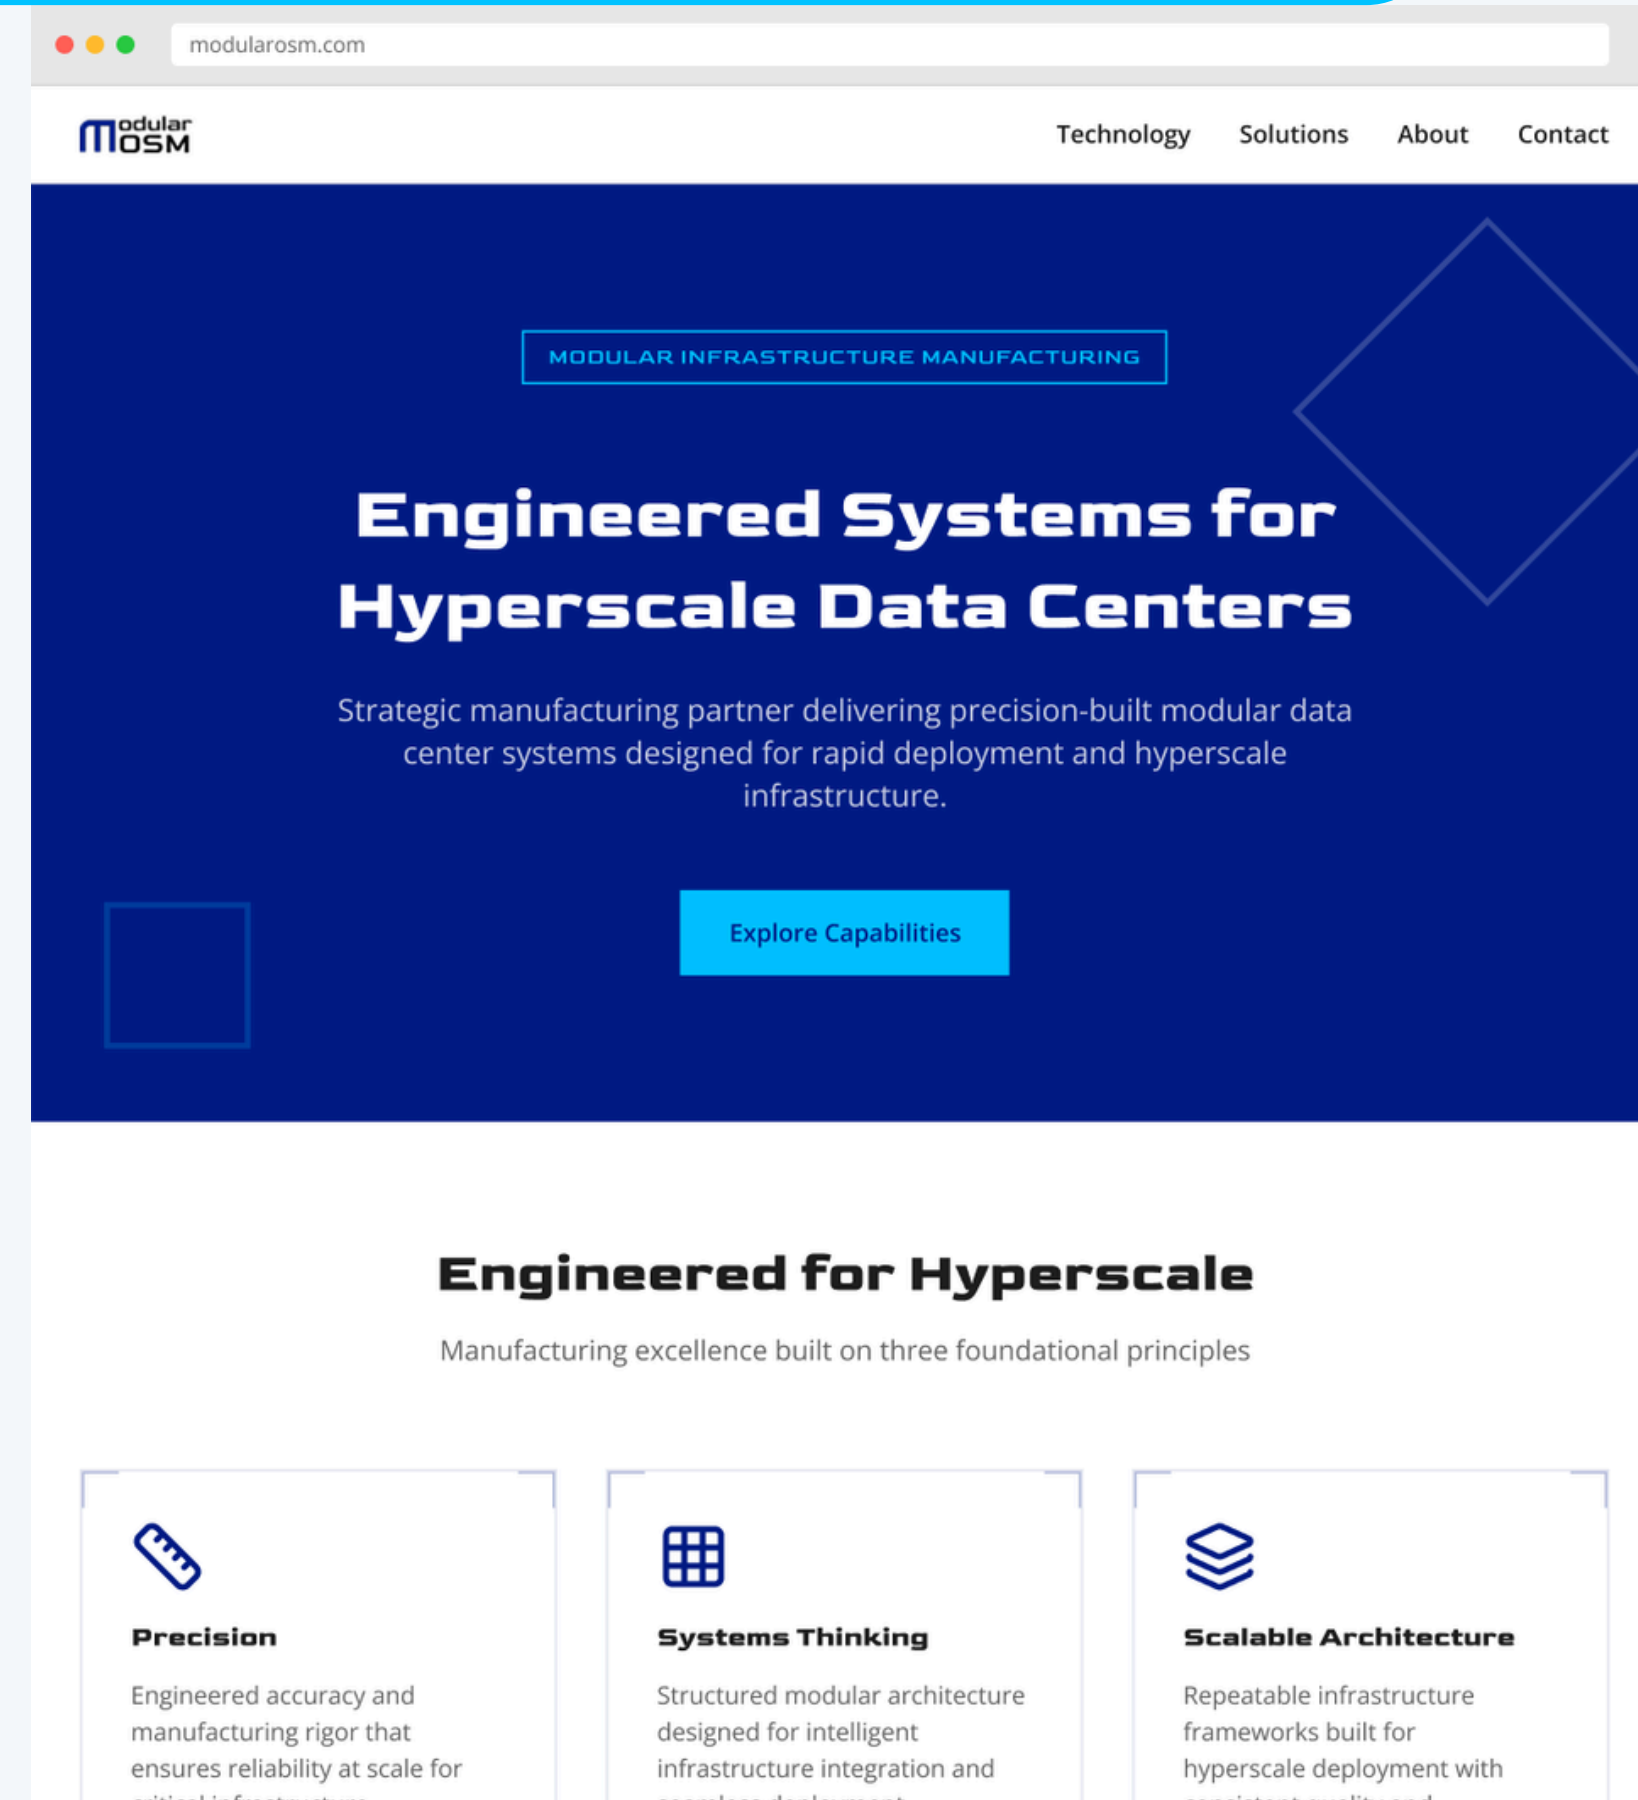

Simplified infrastructure flows communicating technical systems

Website Concept

The ModularOSM website concept translates the brand system into a clear, modular digital interface designed to communicate infrastructure solutions, technology, and scalability to investors and clients.

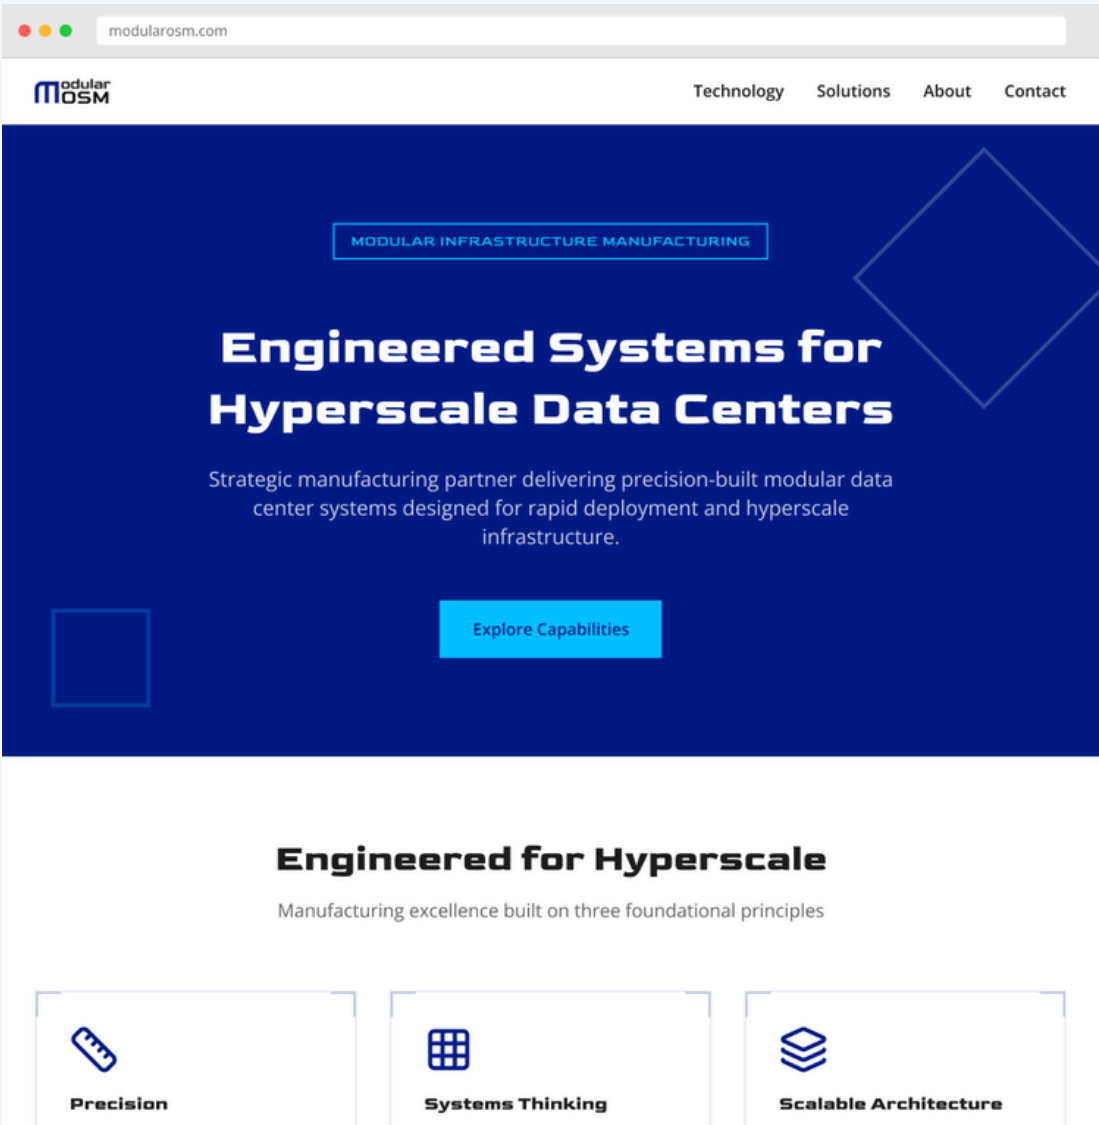

Website concept was generated and refined in Figma Make, applying the ModularOSM brand system, typography, and color hierarchy.
